

CACHE INFOTECH PVT. LTD.

Transforming Businesses Through Intelligent IT
Ecosystems

Cloud | Compliance | Cyber Security | Enterprise Software | Infrastructure

About Us

At **Cache Infotech**, we don't just deliver IT solutions we **engineer scalable, secure, and future-ready digital ecosystems.**

With over a decade of excellence, we empower organizations across industries to:

- ✓ Consulting for GRC Compliance
- ✓ Accelerate digital transformation
- ✓ Strengthen cybersecurity frameworks
- ✓ Optimize IT infrastructure & operations
- ✓ Enable smarter, data-driven decision-making

 **Headquartered in New Delhi | Pan-India Presence**

Our Legacy & Growth

Founded in 2007, Cache Infotech has evolved into a **trusted system integrator and technology partner** for enterprises across India.

Driven by Visionary Leadership

Under the guidance of **Mr. Alok Gupta**, we continue to deliver **innovation-led IT solutions with unmatched reliability.**

 **1000+ Clients**

 **1 Million+ Endpoints Managed**

 **Multi-domain Expertise**

 **Presence Across 20+ Cities**

Industries We Serve

We power digital transformation across:

BFSI

Education

Healthcare

Logistics & Supply Chain

Retail & E-commerce

IT & Telecom

Manufacturing

F&B & Hospitality

Government & PSU

Energy & Utility

What We Do

AI | GRC Compliance | Security | Cloud | Enterprise Software |
Managed Services

➤ AI and GRC

- DPDPA Compliance & Implementation
- AI automation of compliance workflows
- DSARs and consent management
- Privacy Intelligence & Impact Assessment
- Internal Audit & Assurance
- Internal Financial Controls (IFC) Review
- Compliance Management & Automation
- Privacy impact assessment
- Risk assessment
- Policy management
- Audit readiness
- Data Mapping & Lineage
- Enterprise Risk Management (ERM)

➤ Cybersecurity

- Application Security
- Threat Detection & Response
- Vulnerability Assessment & Penetration Testing
- Network Security
- Endpoint Protection
- Data Security
- Security Operations Center (SOC) Services
- Information Security Management Services (ISMS)
- IT General Controls (ITGC) Assessment
- IT Governance Framework Implementation
- Breach & Attack Simulation (BAS)
- Enterprise Attack Surface Monitoring
- Patch Management & Auditing
- Web Application Firewall & API Security Management
- DDoS Protection
- Managed data protection, zero-trust access, cloud security, and secure access service edge
- Email Security, Active Directory & Secure File Management
- Managed SD-WAN

➤ Managed Services

- Service Desk & End-User Support
- Infrastructure Services
- Network & Security Management
- Application Management & Support
- 24/7 Monitoring & Incident Response
- Threat Monitoring & Management
- Anti-Phishing & Anti-Malware Monitoring
- Cyber Threat Intelligence
- Security Operations Center (SOC) Project Management
- Security-as-a-Service
- DDoS Monitoring
- Managed WAF, DLP, SD-WAN & NMS
- Managed Patch & Asset Management
- Managed Backup & Storage
- Managed Cloud Services

➤ Application Development & ML

- Custom Web, Mobile & Enterprise Application Development
- UI/UX Design, Prototyping & User Research
- Microservices, API Development & System Integration
- Cloud-Native & Serverless Application Architecture
- Machine Learning Model Development & Deployment
- Predictive Analytics & Business Intelligence Solutions
- Natural Language Processing & Conversational AI
- Computer Vision & Intelligent Document Processing
- AI-Powered Recommendation Engines & Personalization
- Workflow Automation & Intelligent Process Automation
- MLOps — Model Monitoring, Retraining & Lifecycle Management
- End-to-End: Consulting → Design → Development → Deployment → Support
- Predictive Analytics & Forecasting
- Descriptive & Prescriptive Analytics
- Diagnostic Analytics & Root Cause Analysis
- Post-Facto Analysis & Reporting
- Continuous Control Monitoring (CCM)

➤ Cloud Solutions

- Cloud Strategy & Consulting
- Cloud Migration & Modernization
- Implementation & Integration
- Cloud Security & Governance
- Multi-Cloud & Hybrid Cloud Management

➤ Enterprise Software

- Enterprise Application Implementation
- ERP Solutions
- Licensing & Productivity Solutions
- Email Security & Archival
- Customization & Integration
- Migration & Upgrades

➤ IT Infrastructure

- Data Center & Compute Infrastructure
- Network & Connectivity Solutions
- Cloud & Hybrid Infrastructure
- Storage & Backup Solutions
- Infrastructure Monitoring & Management

➤ Telecom & Connectivity

- Voice, Data & IVR Solutions
- SD-WAN & MPLS Connectivity
- Internet Lease Line (ILL)
- Point-to-Point & Co-location
- PRI, SIP & Toll-Free Solutions
- Routers, Switches & Firewalls
- Data Center Setup & Management

➤ Management Consulting

- Robotics Process Automation (RPA) Implementation
- Business Transformation & Change Management
- Business Strategy & Growth Advisory
- Technology Transformation Consulting
- Project Management Consulting & PMO Setup
- Operating Model Design & Optimization
- Digital Roadmap & Innovation Strategy
- Stakeholder Alignment & Governance Frameworks

➤ Government Advisory

- Robotics Process Automation for Government Processes
- Public Sector Business & Digital Transformation
- e-Governance Strategy & Implementation
- Government IT Infrastructure Modernization
- Technology Transformation for PSUs & Ministries
- Project Management Consulting for Government Projects
- Policy & Compliance Framework Development
- Citizen Service Delivery Optimization

Cyber Security

- Application security
- Threat detection
- Vulnerability assessment
- Network security
- Endpoint protection
- Data security
- Security Operations Center (SOC) services

Clients

Why Cache Infotech

What Makes Us Different?

- ✓ 100% Client Reference Record
- ✓ End-to-End Integrated Solutions
- ✓ Cost-Effective & Modular Approach
- ✓ Fast Deployment & ROI
- ✓ Industry-Agnostic Expertise
- ✓ Future-Ready Technologies

Awards & Recognition

- Acer VAR Partner Certificate
- Best Channel Partner Award
- Best Security Solution Partner
- Channel Accelerator Awards (2022 — SME Channels)
- Channel Accelerator Awards (2023 — SME Channels — Systems Integrator)
- Channel Accelerator Awards (2024 — SME Channels — Systems Integrator)
- Channel Accelerator Awards (2025 — SME Channels — Top Systems Integrator)
- MSP India Summit Award
- CRN Excellence Awards
- Authorized Growth Partner
- 360° Partnership Award
- Fastest Growing SI Partner in India
- Best System Integrator — Delhi (DT Partner Excellence Awards, 2023)
- Best System Integrator — Delhi (DT Digital Terminal, 2023)
- Fastest Growing Integrated IT Solutions Partner
- Sponsor Recognition — INNOSKILL
- North Star Award — Highest Units Q3
- North Star Award — Highest TC+TP Mix H1
- Certificate of Achievement — TC+TP Mix

Our Promise

At **Cache Infotech**, we are committed to:

- ✓ Delivering measurable business value
- ✓ Building long-term partnerships
- ✓ Driving innovation with responsibility
- ✓ Ensuring security, scalability, and success

Case Studies & Use Cases

Haryana Government – Health Department Digital Transformation

Client: Haryana Govt Health Department

Partner: UHG

Overview

Cache executed a large-scale IT infrastructure and digital transformation project across 170 healthcare locations.

Health Department, Haryana
स्वास्थ्य विभाग, हरियाणा

UNITEDHEALTH
GROUP

Solution

- Deployment of **6000+ endpoints**
- Installation of **200+ servers, UPS, & bandwidth systems**
- Development of **custom HRMS software**
- Implementation of **NMS platform**
- End-to-end **Managed Services**

Impact

- Faster processes
- Increased transparency
- Reduced errors
- Scalable automation

Retail Industry – Smart IT, Surveillance & Analytics

Overview

Complete IT ecosystem for multi-location retail operations.

Solution

- IT infrastructure & telecom integration

AI-enabled IP Surveillance systems

- Footfall & visitor analytics
- Attendance systems
- NMS platform

24x7 Managed Services

Impact

Increase in efficiency
Centralized monitoring
Improved store security
Data-driven insights

Automotive Sector – Cybersecurity

Overview

Enhanced cybersecurity posture for a leading automotive enterprise

Impact

- Early threat detection
- Data protection
- Stronger security framework

Solution

- Dark Web Monitoring
- Cyber Threat Intelligence platform
- Real-time alerts
- SOC-enabled **Managed Services**

BFSI Sector – Email Security & Compliance

Overview

Secure email ecosystem for financial operations.

Impact

- 90% reduction in phishing
- Compliance achieved
- Secure email management

Solution

- Email Security Gateway
- Email Archival solution
- AI-based threat detection
- Continuous **Managed Services**

BFSI Sector – Email Security & Compliance

➤ Overview

Secure email ecosystem for financial operations.

Solution

➤ Privacy Impact Assessment

Conduct DPIA and Risk Assessments

Perform Data Protection Impact assessment and Risk Assessments to identify applications and business processes handling PII and to assess compliance

Data Discovery and Classification

Automated Classification Leverage prebuilt and customizable classifiers to label sensitive data accurately. Perform Data discovery, Data Mapping and build Data Bill of Materials (DBOM), Record of Processing activities (RoPA) to understand the data that your organization owns of the Data Principal

➤ **Data Principal Rights Management**

Streamlined Rights Fulfillment

Streamlined Rights Fulfillment through efficient detection and correlation of a data principal's (customer's) personal data across diverse sources.

Case Management Workflow

Automate data access, correction, and deletion requests using structured case management workflows

➤ **Privacy Assessment Automation**

Inbuilt Privacy Assessment Templates

Leverage the built-in Privacy Assessment templates and clone and customize them to suit specific business needs.

Create and Track Privacy Assessments

Automate privacy risk assessments such as DPIA, RoPA, and gap assessments to identify potential risks and maintain ongoing compliance

Implement Data Principal Rights Management

Build secure portal for Data Principal to exercise their rights (submit requests such as Right to access, Right to Erasure and Right to Correct) and privacy teams to manage and fulfill requests

Enable privacy and data teams to take actions on Data Principal Rights using data discovery module

➤ Universal Consent & Preference Management

Centralized Consent Management

Centralize customer consent and preference management through an intuitive dashboard. Empower users to modify, withdraw, or view their consent choices in real time including Parental / guardian consent for children & person with disabilities

Seamless Downstream integration

Seamlessly integrate with downstream systems such as databases, CRMs, and marketing platforms to honor customer preferences across all touchpoints

Enforce Storage Limitation Requirements

Establish data retention rules & data deletion schedules as per rules depending on class of data fiduciary (e-commerce, social media and online gaming)

➤ Data Breach Notifications

Data Breach Incidents

Log Data Breach Incidents with details on the severity of the breach, date of occurrence, impact of the breach, data principals affected, etc.

Customizable Notification Templates

Create data breach notification templates with granular customization of design, font, and content. Leverage targeted templates for different stakeholders.

Timely Breach Notification Delivery and Tracking

Schedule breach notifications according to the required time and date, and auto-populate incident details in notifications from logged incidents. Keep track of sent messages and send follow-up notifications for existing incidents to data protection board meeting regulatory requirements without any delay.

➤ **Insights and Analytics**

Sensitive Data Insights

Aggregate insights from discovered data into a centralized dashboard, displaying classification results, identified PII, and precise data locations. Contextual tags enhance data visibility, improving governance and compliance.

Compliance Insights

Visualize sensitive data trends and patterns with interactive dashboards that enable organizations to make informed decisions and enhance their governance efforts.

➤ **Other Key Features**

Role-Based Access Control

Enforce granular access controls by defining roles, such as Data Privacy Officer, Data Analyst, and Business Owner, to ensure access is restricted based on individual responsibilities.

Deployment Flexibility

Deploy Ardent Data Privacy as a SaaS or on-premises solution to align with your organization's infrastructure and security preferences.

Manufacturing Enterprise – Process Automation (Low Code/ No Code)

➤ Overview

Automation of critical business processes beyond ERP

Solution

- Automation of **25+ processes**
- Low-Code/No-Code platform deployment
- Workflow digitization & approvals
- ERP integration
- Real-time dashboards
- Ongoing **Managed Services**

Impact

- 50–60% faster processes
- Increased transparency
- Reduced errors
- Scalable automation

Education Sector – Smart Campus & Digital Infrastructure

➤ Overview

Cache is actively working with educational institutions across North India, enabling **smart, secure, and digitally connected campuses**.

Impact

- Digitally connected and secure campuses
- Improved operational efficiency
- Enhanced student safety
- Real-time monitoring and reporting
- Reduced manual administrative workload

Challenges

- Lack of integrated campus IT infrastructure
- Limited visibility on student movement and attendance
- Security concerns across large campuses
- Manual administrative processes

Key Use Cases

- Student & staff attendance automation
- Campus security & surveillance monitoring
- Visitor tracking & access control
- Digital administration workflows
- Smart classrooms & connected learning

Solution

- Deployment of **Campus-wide IT Infrastructure & Wi-Fi networks**
- Implementation of **Smart Surveillance Systems with AI analytics**
- **Biometric/RFID-based Attendance Systems**
- **Visitor Management Solutions**
- Integration of **Learning & Administrative Platforms**
- Centralized **Network Monitoring System (NMS)**

Enterprise Grade IT & Management Services

➤ Overview

Scalable IT infrastructure and managed services for enterprises

Solution

- End-to-end IT deployment
- NMS & SOC integration
- Annual Managed Services (AMS)
- AI-driven monitoring

Impact

- 40% cost reduction
- Improved uptime
- Future-ready IT systems

Government Sector – Transport Automation

➤ Overview

Digitization of transport operations

Solution

- Workflow automation
- System integration
- Digital tracking
- Managed Services

Impact

- Faster services
- Reduced errors
- Better citizen experience

Healthcare Sector

➤ Overview

Cache is a **trusted technology partner for leading hospitals across Delhi NCR**, delivering end-to-end IT, automation, telecom, and security solutions to enable **smart, connected, and patient-centric healthcare ecosystems**.

Key Challenges

- Disconnected hospital IT systems
- High dependency on manual processes
- Data security & patient privacy concerns
- Network downtime affecting critical care
- Lack of centralized monitoring

Healthcare Sector

Cache

IT Infrastructure

- Hospital-wide **IT infrastructure deployment (servers, endpoints, storage)**
- High-speed **network & Wi-Fi across departments (ICU, OPD, labs)**
- Data center setup & virtualization

Telecom & Communication

- **IP Telephony & unified communication systems**
- Nurse call systems & internal communication
- Integration across departments for seamless coordination

Cybersecurity

- Patient data protection & compliance solutions
- Endpoint & network security
- SOC-enabled monitoring for cyber threats

Data Analytics

- Hospital dashboards (patient flow, bed occupancy, operations)
- Reporting & analytics for decision-making
- Integration with HIS/ERP systems

Surveillance & Safety

- AI-enabled CCTV monitoring
- Access control in critical areas
- Command center for hospital security

Managed Services

- **24x7 IT & network monitoring (NMS)**
- On-site & remote support teams
- Preventive maintenance & upgrades
- Continuous improvement as a **long-term technology partner**

Use Cases

- Digital hospital infrastructure setup
- Multi-location hospital network integration
- Patient data security & compliance
- Smart surveillance for safety & monitoring
- Workflow automation across departments
- Telecom integration for seamless communication

Our Strengths

Innovation

Continuously evolving with cutting-edge technologies

Customer-Centric Approach

Dedicated support with rapid response

Scalability

Solutions designed to grow with your business

Quality Assurance

Proven, tested, and reliable implementations

Our Motto

“Cache empowers BFSI, Healthcare enterprises, governments, and educational institutions with AI-driven Cybersecurity, Automation solutions, IT Infrastructure Delivering secure, Scalable, and future-ready digital ecosystems backed by robust managed services.”
